

SUPPLY OF TURN-KEY BAGGING SYSTEMS FOR CEMENTITIOUS MATERIALS WITH CONTINUA™ FFS

The CONCETTI GROUP, internationally acknowledged as a leader in the design and production of complete packaging lines for bags, boasts an extensive experience in the application of its innovative CONTINUA™ FFS technology to the bag packaging of:

cement premixes, concrete, mortar, grout, sand and gravel, etc.

CONTINUA™ FFS forms, fills and seals flat and gusseted bags made from a PE tubular film, ranging from approx. 10 to 30 kg.

Only recently has the CONCETTI GROUP been awarded four new orders from major international customers for the supply of turn-key weighing, bag filling, closing and palletising systems for building materials (cement premixes) basing on its CONTINUA™ FFS-technology:

- CHARAH (USA)
AMEREN (USA)
HANSON (UK)
BASF CONSTRUCTION CHEMICALS (ITALY)

Two-handled bags made by CONTINUA™ FFS

- Versatile
Cost-effective
Reliable

Net weigher with screw feed Special construction of the screw with anti-abrasive coating for a longer life
