

## Recent Machine Developments

### FFS + IGF™

High versatility, automatic system for bagging bulk products (5-50 kg) either in pre-made bags or in bags made from a PE-tubular reel (FFS technology). Production: up to 1200 bags/h

### IPF 40™

High speed weighing and bagging system for pet food and cat bitter with double bag feeding station. Production: up to 2600 bags/h

### CONTINUA FFS™ FOR LIQUIDS

Fully automatic bagging system to form, fill and seal bags made from a PE-tubular reel. Suitable for liquid based products such as ready-made mortar, lime and plaster. Production: over 700 bags/h

### IGF 1200™

Fully automatic weighing and bagging system for bulk products (1,5-25 Kg and 5-50 kg). Suitable for any kind of pre-made bags (gusseted, flat, plastic, paper, PP-woven etc.) Production: up to 1200 bags/hs/h

### CONTINUA FFS™ WITH AUGER FILLER

Fully automatic form-fill-seal system for aerated, fluidized or very sticky products. It features an auger that moves inside the bag and fills it from the bottom to the top

### CAROUSEL 1100™

Fully automatic bagging carousel system for pre-made open mouth bags containing very aerated products (e.g. flour). Bag size range 10-50 kg. Production: up to 1100 bags/h

### CONTINUA 2000™

High speed, fully automatic bagging system to form, fill and seal bags made from a PE-tubular reel, for free-flowing products. Production: up to 2000 bags/h
