

COMPLETE TURN-KEY BAGGING, CLOSING AND PALLETISING INSTALLATION OF ANIMAL FEED INTEGRATORS

Complete bagging line composed of:

- GROSS/N™ weigher
- IGF 600™ bagging machine
- Thermal-transfer printer
- PS-4A/6S-C™ palletiser
- Automatic empty-pallets feeder

Technical data:

- Product:** Animal feed integrator
- Bags type:** Paper with PE liner, flat with bottom.
- Bag size:** 20-30 kg
- Bag Closing:** Folding of the top and simple stitching.
- Capacity:** Up to 250 b/h

Description of the line:

CONCETTI Group, is one of the world leaders in designing and producing complete bagging lines. Each Concetti machine, when integrated in a complete system, is totally self-adjustable in case of size change, which occurs by means of specific programs, related to the weight and dimension of the bags.

The master PLC transmits all the necessary instructions to each component of the system; in particular, the bagging machine manages the empty bags magazine, the height of the roller conveyor and the closing unit.

The parameters are then transmitted to the weigher, the printer, the press, the palletiser and to the pallets dispenser.

The single-column robot palletiser is integrated with the press, the empty pallet dispenser and the motorised roller conveyor, which holds the finished pallets.
