

TOTE[®] Systems Side Door Bins

Considering that there are hundreds of thousands of TOTE[®] containers in use today, it's not surprising that our Side Door Bin is the number one intermediate bulk handling container in the industry. Our extremely efficient patented door design (invented by TOTE[®] in 1946) has been utilized in virtually every conceivable bulk handling situation. The most common examples include pharmaceutical, food, plastics, chemicals and so many more. The unique design of our door allows even the stickiest of materials to discharge quickly and completely.
